

QASAIR rangehoods are fitted with low voltage halogen lights which give a very clear, bright light. These become very hot if left on for a long period and can burn out. Please switch off after use.

1. Turn off power at power point.
2. Turn retaining ring anticlockwise and pull down.
3. Tilt lamp up slightly at retaining spring opening position and slide lamp out sideways.
4. Unplug lamp from the ceramic connector and replace lamp.
5. If retaining ring will not rotate, dislodge lamp by gently pushing upwards to obtain a better grip.

ROTATE ANTI CLOCKWISE TO REMOVE

Filters

For the best results, please clean filters regularly, you can do this by hand washing or placing in the dishwasher. Try not to use any citrus or costic products as this can cause corrosion.

LAMP replacement and FILTER care
